International Anatomical Sciences

Why Health Libraries?

Designed to support foundational learning and clinical practice, Health Libraries deliver trusted health science education and clinical content to students, trainees, fellows, program directors, faculty, and new clinicians through a single portal — providing interactive online access to a combination of essential book content, multimedia & imagery, real-life case studies, and quizzes.

Health Library: International Anatomical Sciences is used primarily in Medical Education, Exercise Science, Physiotherapy, Occupational Therapy, and other allied health programs to ensure students acquire a firm grasp of anatomy to support coursework and exams.

Key Features of Health Libraries:

- **Account personalization:** Save content to your own MyHealthLibrary, access Health Library from any computer, and set up email alerts for when new content is added
- **Quizzing/self-assessment:** Create custom quizzes organized by topic, keep track of responses, and link to specific textbook content to help with remediation
- **Advanced semantic search:** View results displayed by title, chapter, topic, and/or type of resource
- **Responsive design:** Browse content on your computer, tablet or smartphone with ease
- **Self-directed learning:** Simple, intuitive navigation and individualized self-assessments give students and trainees control over their progress and motivation to learn
- **Sharing:** Much content, including technical videos, can be shared with colleagues and classmates
- **Multimedia ancillary content:** Access to videos, images, self-assessments, cases, and more
- **Instructor resources:** PowerPoint presentations, lecture notes, test banks, and case studies accessible from directly within each Health Library and easy incorporation into courses; chapter and figure conversion guides help migrate from one book edition to the next, ensuring content currency
