

Ovid® Evidence-Based Medicine Reviews

A single, easy-to-use source for essential EBM content

Ovid's Evidence-Based Medicine Reviews (EBMR)

Support the international movement towards integrating EBM into clinical practice by bringing the “best evidence” from medical research to the bedside, clinic, and community.

Healthcare professionals around the world look to evidence-based medicine (EBM) as the new standard for clinical care. EBM promotes care that is both experience-based and clinically-proven by integrating the practitioner's clinical expertise with the best available clinical evidence.

EBM is supported by healthcare institutions worldwide, including the American College of Physicians (ACP), the Cochrane Collaboration, and the NHS Centre for Reviews and Dissemination (CRD).

- Get quick, easy access to the most widely used, evidence-based medicine resources, together in one convenient package.
- Find full-text summary reviews that make key information available at a glance.
- Keep current with monthly updates.
- Take advantage of Ovid's powerful search functionality and time-saving workflow tools, including inline abstracts, Auto-Alerts delivered via RSS, flexible search results sorting, and more.
- Search bibliographic records simultaneously with book and journal content.

Includes:

Cochrane Database of Systematic Reviews

Cochrane Collaboration - Reliable, bottom-line answers to the most commonly asked clinical questions, based on comprehensive and expert analysis of the medical literature. Includes the full text of the regularly updated systematic reviews of the effects of healthcare prepared by the Cochrane Collaboration.

The reviews are presented in two types:

1. Cochrane Methodology Reviews are full-text systematic reviews of methodological studies. The reviews are both highly structured and systematic.
2. Protocols provide place-markers for reviews, which are currently being written. They summarize the background and the rationale of the review.

Cochrane Clinical Answers

Cochrane Collaboration

Cochrane Clinical Answers (CCAs)

provide a readable, digestible, clinically focused entry point to rigorous research from Cochrane systematic reviews. They are designed to be actionable and to inform decision-making at the point of care.

Evidence-Based Medicine Reviews

Ovid's EBMR uniquely combines several of the most trusted evidence-based medicine resources in a single, fully searchable database.

Also includes:

- **Cochrane Central Register of Controlled Trials (CENTRAL)** — Cochrane Collaboration
The largest register of its kind, this database contains over 2 million bibliographic references to definite randomized controlled trials or controlled clinical trials. It also contains relevant records from MEDLINE®, EMBASE®, and other bibliographic databases, as well as information on unpublished trials.
- **ACP Journal Club — American College of Physicians®** The ACP Journal Club collection provides you with two leading journals: ACP Journal Club, a publication of the American College of Physicians and Evidence-Based Medicine, a joint publication with the British Medical Journal Publishing Group.

As well as archives from:

- **Health Technology Assessments (HTA)** — NHS Centre for Reviews and Dissemination.
In collaboration with Sweden's International Network of Agencies of Health Technology Assessment, HTA brings together details on ongoing studies of the medical, social, ethical, and economic implications of healthcare interventions. It contains 4,000 records of completed and ongoing assessments from members of INAHTA.
- **The Database of Abstracts of Reviews of Effectiveness (DARE)** — NHS Centre for Reviews and Dissemination
Selected systematic reviews on the effectiveness of clinical interventions and policies from databases such as MEDLINE and through manual review of the primary literature. These high-quality reviews are based on evaluation of literature searching, inclusion criteria, study assessment, and synthesis.
- **NHS Economic Evaluation Database (NHS EED)** — NHS Centre for Reviews and Dissemination.
Over 6,000 abstracts of quality assessed economic evaluations to assist decision-makers by systematically identifying and describing economic evaluations, appraising their quality, and highlighting their relative strengths and weaknesses.
- **Cochrane Methodology Register (CMR)** A bibliography of more than 9,000 references to controlled trials in journal articles, book chapters, conference proceedings and reports, and other publications of methodologies used in health studies.

Additional Evidence-Based Content

Ovid is a leading provider of additional evidence-based resources, including:

- | | |
|---|--|
| • Evidence-Based Medicine
BMJ Publishing Group | • JB1 Evidence Implementation
Lippincott |
| • Evidence Based Mental Health
BMJ Publishing Group | • Journal of Evidence-Based Medicine
Wiley |
| • Evidence Based Nursing
BMJ Publishing Group | • The Journal of Evidence-Based Dental Practice
Elsevier |
| • Evidence-Based Ophthalmology (Archive Only)
Lippincott® | • Worldviews on Evidence-Based Nursing
Wiley |
| • JB1 Evidence Synthesis
Lippincott | |

And over a dozen books on evidence-based medicine including, **Decision Making in Emergency Care: An Evidence-Based Handbook**, and **Best Practices: Evidence-Based Nursing Procedures and Internal Medicine Evidence: The Practice-Changing Studies**.
